# On a mission to transform the construction industry.

Starting with information and collaboration in the field.

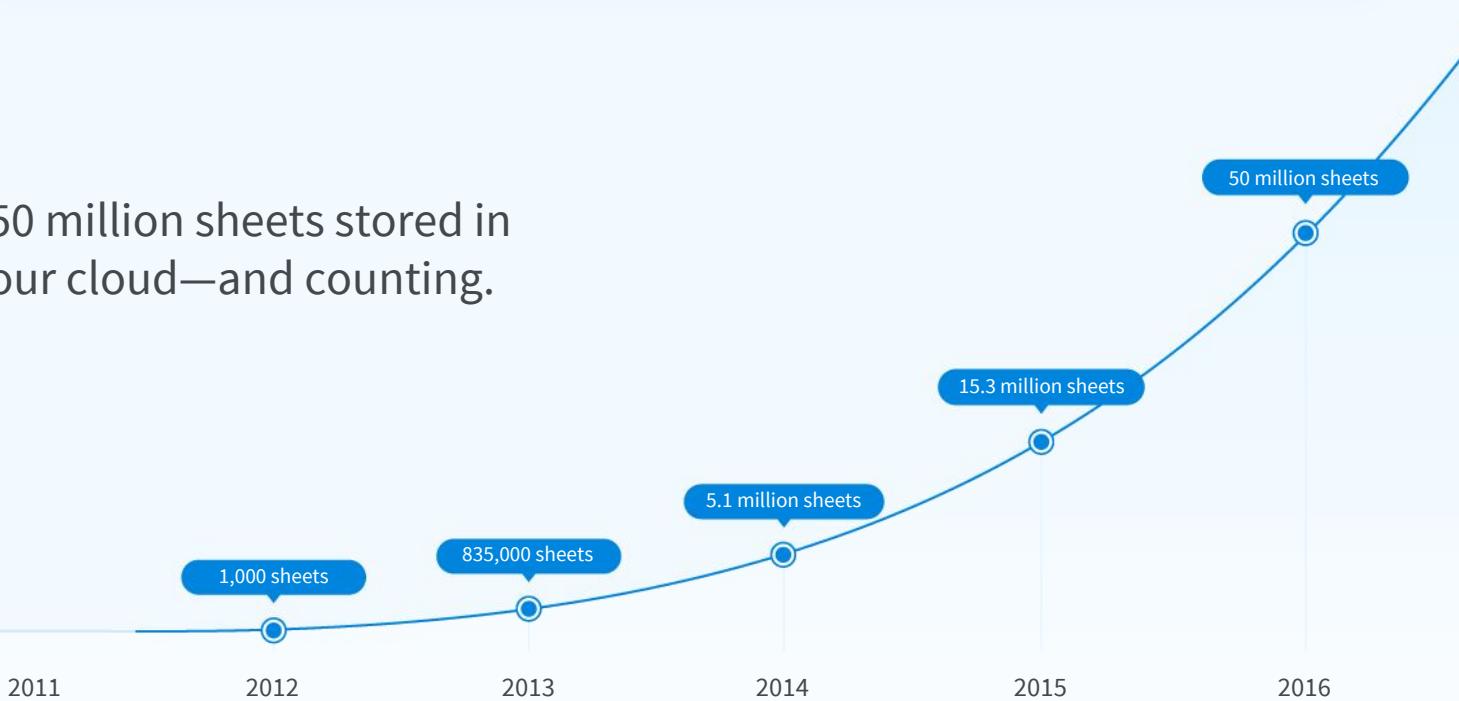

## Construction is behind

Nearly every construction project sees overruns in cost and schedule. While office workers have seen huge productivity gains from software, construction has been left behind. It wasn't practical to lug a laptop around a jobsite, but everything is changing with smartphones and tablets.

## Where the world is heading

PlanGrid is an intuitive, sheet-based mobile construction app that keeps everyone building from the current set. Today, PlanGrid is the world's most downloaded construction app, with a five-star rating and over 5,300 App Store reviews.

50 million sheets stored in our cloud—and counting.

# The construction app built for teams.

 App Store  
★★★★★ 3,438

 Google Play

 Windows  
NOW AVAILABLE

PlanGrid is where your team builds together.  
Create and share plans, punchlists, progress reports,  
and more—instantly from the field.

## Why people love PlanGrid:

**Reclaim your time**  
Say goodbye to handling paperwork, chasing information, and making repeated trips to the trailer.

**Build more, stress less**  
Avoid costly rework from building from outdated drawing sets or missing project details.

**Work together, faster**  
No more waiting to collect and share field information with your project teams and systems.

# Build with confidence.

## Easy navigation

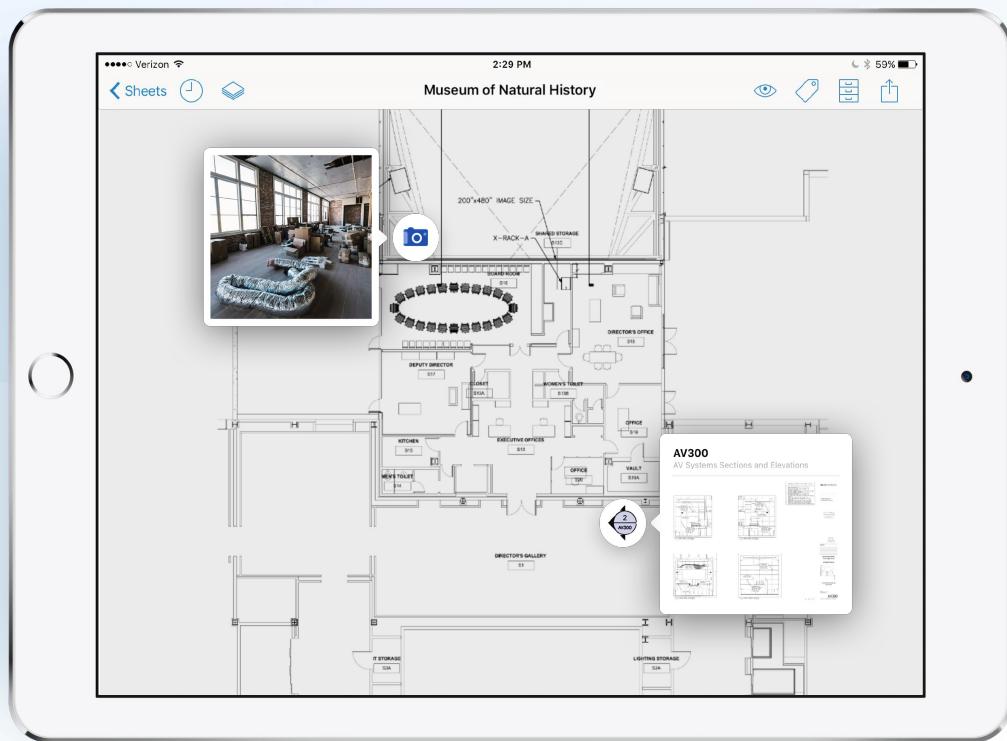

PlanGrid automatically links your detail callouts and text links, making the details you need only a tap away.

## Always in order

Upload a new sheet or version, then sit back and let PlanGrid read the sheet name and leaf it in for you automatically.

## Lightning fast

Zoom in and out smoothly, and skip the wait for your sheets to load. PlanGrid pre-renders every detail.

### Sheet compare

Layer one sheet over another to see how they differ.

### Project documents

Reference RFIs, specifications, submittals, and more.

### Measure and markup

Take measurements and add markups, notes, and photos.

### As-builts

Simplify turnover by creating custom as-builts.

### Tasks, issues, and punch lists

Drop stamps in your plans, add details, and assign owners.

### Instant sync

Publish select markups and documents to the master set.

# The best tools for every job.

Connect PlanGrid with software systems you already know and love.

## Instantly sync across your systems

Entering the same data into multiple applications is a time sink for anyone, especially construction professionals who are trying to minimize the distribution of incorrect or out of date information. Integrating with PlanGrid means you get to enter data once and have it sync automatically with your other systems.

# Learn in minutes, master in days.

World-class training and support teams accelerate your success.

## Implementation and training

Coming from the construction industry, we understand what success looks like and have built programs to help you get there quickly.

### Hands-on

Our live trainers help get your team up to speed quickly while sharing their deep industry expertise, so everyone gets the most out of PlanGrid.

### Tailor-made

We understand every project and company is unique, so we tailor training around real-world workflows and use cases to ensure success.

## Ongoing support

Success does not end once you start using PlanGrid or finish training. We are here to support your success every day.

### Instant access

Our award-winning support team sets the industry standard for response speed—6 seconds in chat, under 1 hour in email—so you are never left waiting for help.

### Quality answers

We go above and beyond to answer your questions and resolve any issues, which is why our customers consistently report 99% satisfaction.

# It just works. On projects of any size.

Vegas Arena

Commercial

*“We used to get a truck to deliver our plans. Six to eight sets of drawings had to be transported. That’s thousands of pages printed every time we made an update. It was incredibly expensive.”*

— Raymond Group

# It just works. On projects of any size.

**Multiple projects**

Healthcare

TEECOM relied on PlanGrid to manage their projects, especially larger ones, where traditional paper plans became too cumbersome, time consuming, and costly to use, and when communication speed across teams was critical to their success. See how they saved hundreds of thousands of dollars on every project with PlanGrid.

## **Time savings** \$340,000

TEECOM was able to save 6-8 hours per user, per week across project managers, engineers, and skilled workers throughout their multi-year projects.

## **Rework savings** \$82,500

They were able to consistently reduce rework by as much as 30% of budgeted rework costs on projects.

## **Paper savings** \$3,500

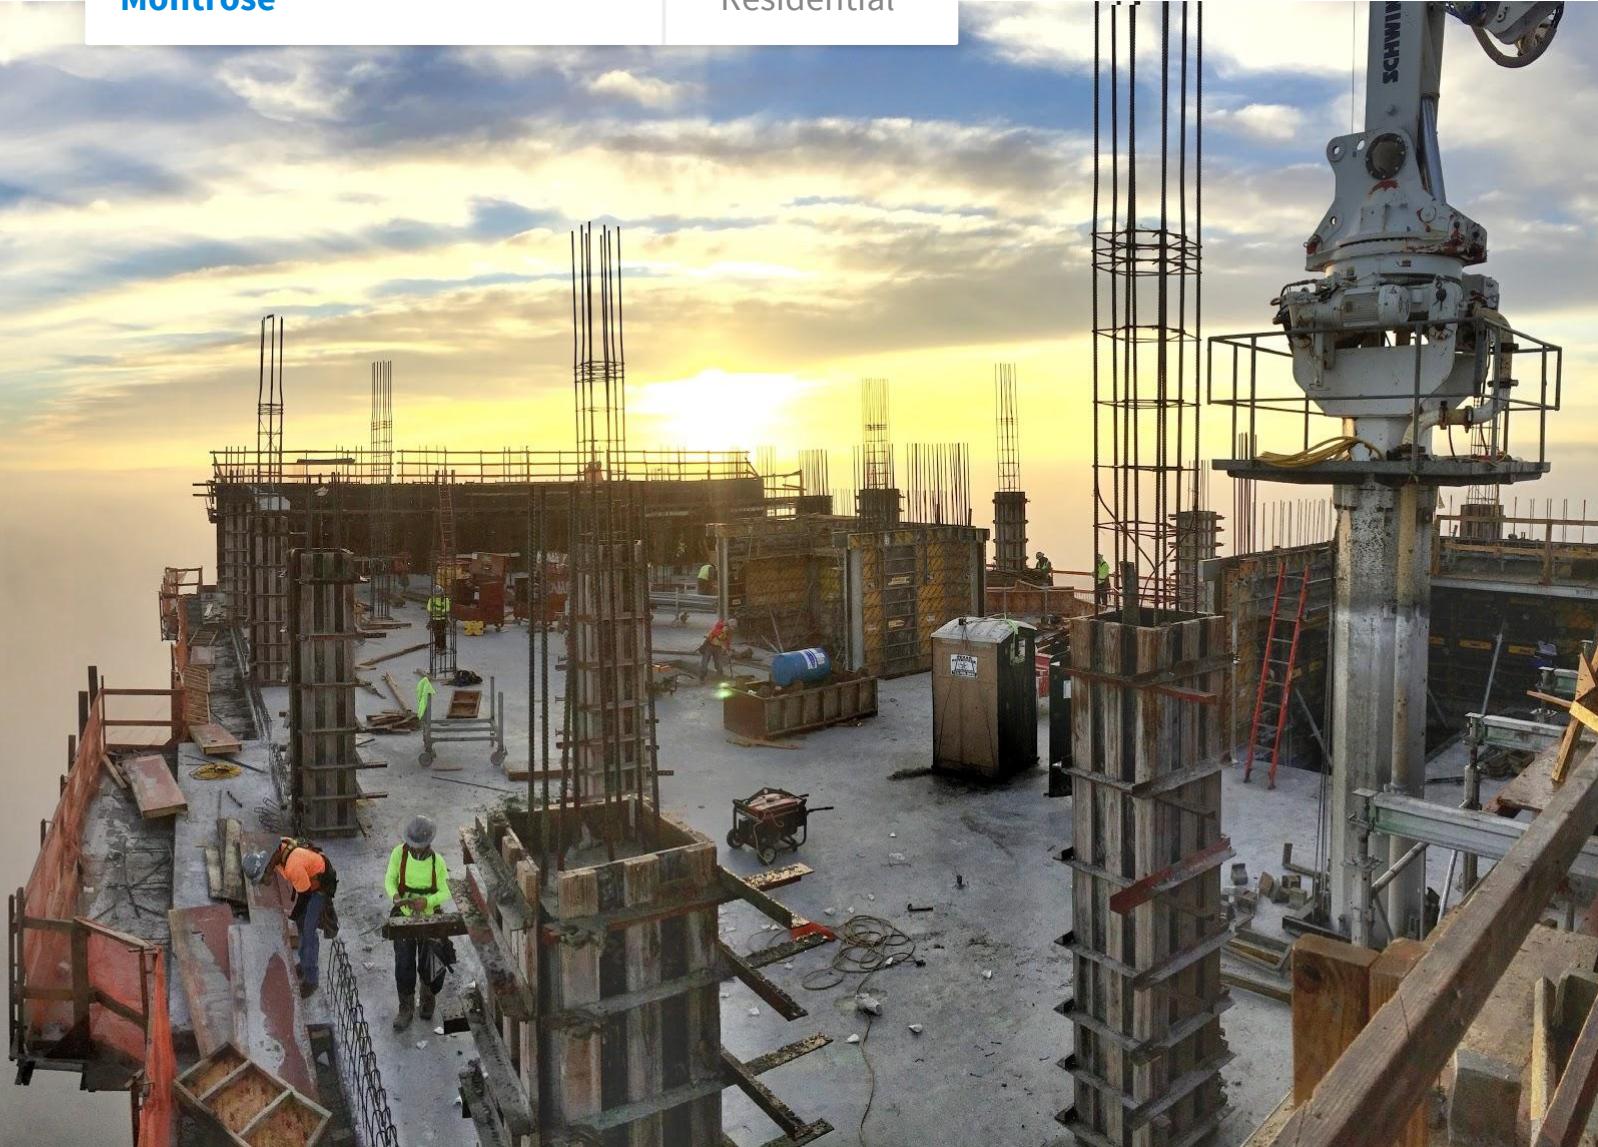

Project owners uploaded thousands of paper sheets to PlanGrid on every project, saving thousands in paper and printing costs.

**Total savings: \$426,000**

# Projects in your pocket. Anytime, anywhere.

Montrose

Residential

*“PlanGrid is my go-to plan when I want to view a project anywhere, on any device. I have used other construction management software claiming to be the best, but they do not cut it.”*

— The Hanover Company

# Projects in your pocket. Anytime, anywhere.

All projects company-wide

All industries

S.M. Wilson & Co. switched from paper to PlanGrid to increase efficiency and transparency on projects by pushing the limits of annotations, photos, automatic sheet slip-ins, and hyperlinked as-builts during closeout. See how they successfully rolled out PlanGrid company-wide.

## Time savings

Beyond automatic slip-sheeting, punch lists have been their largest time-saver, since the architect and engineer have the ability to record and delegate issues during their final walkthrough.

## Rework savings

Using PlanGrid with their subcontractors, they've avoided rework on numerous occasions, just by noticing when subs are working off the wrong plans.

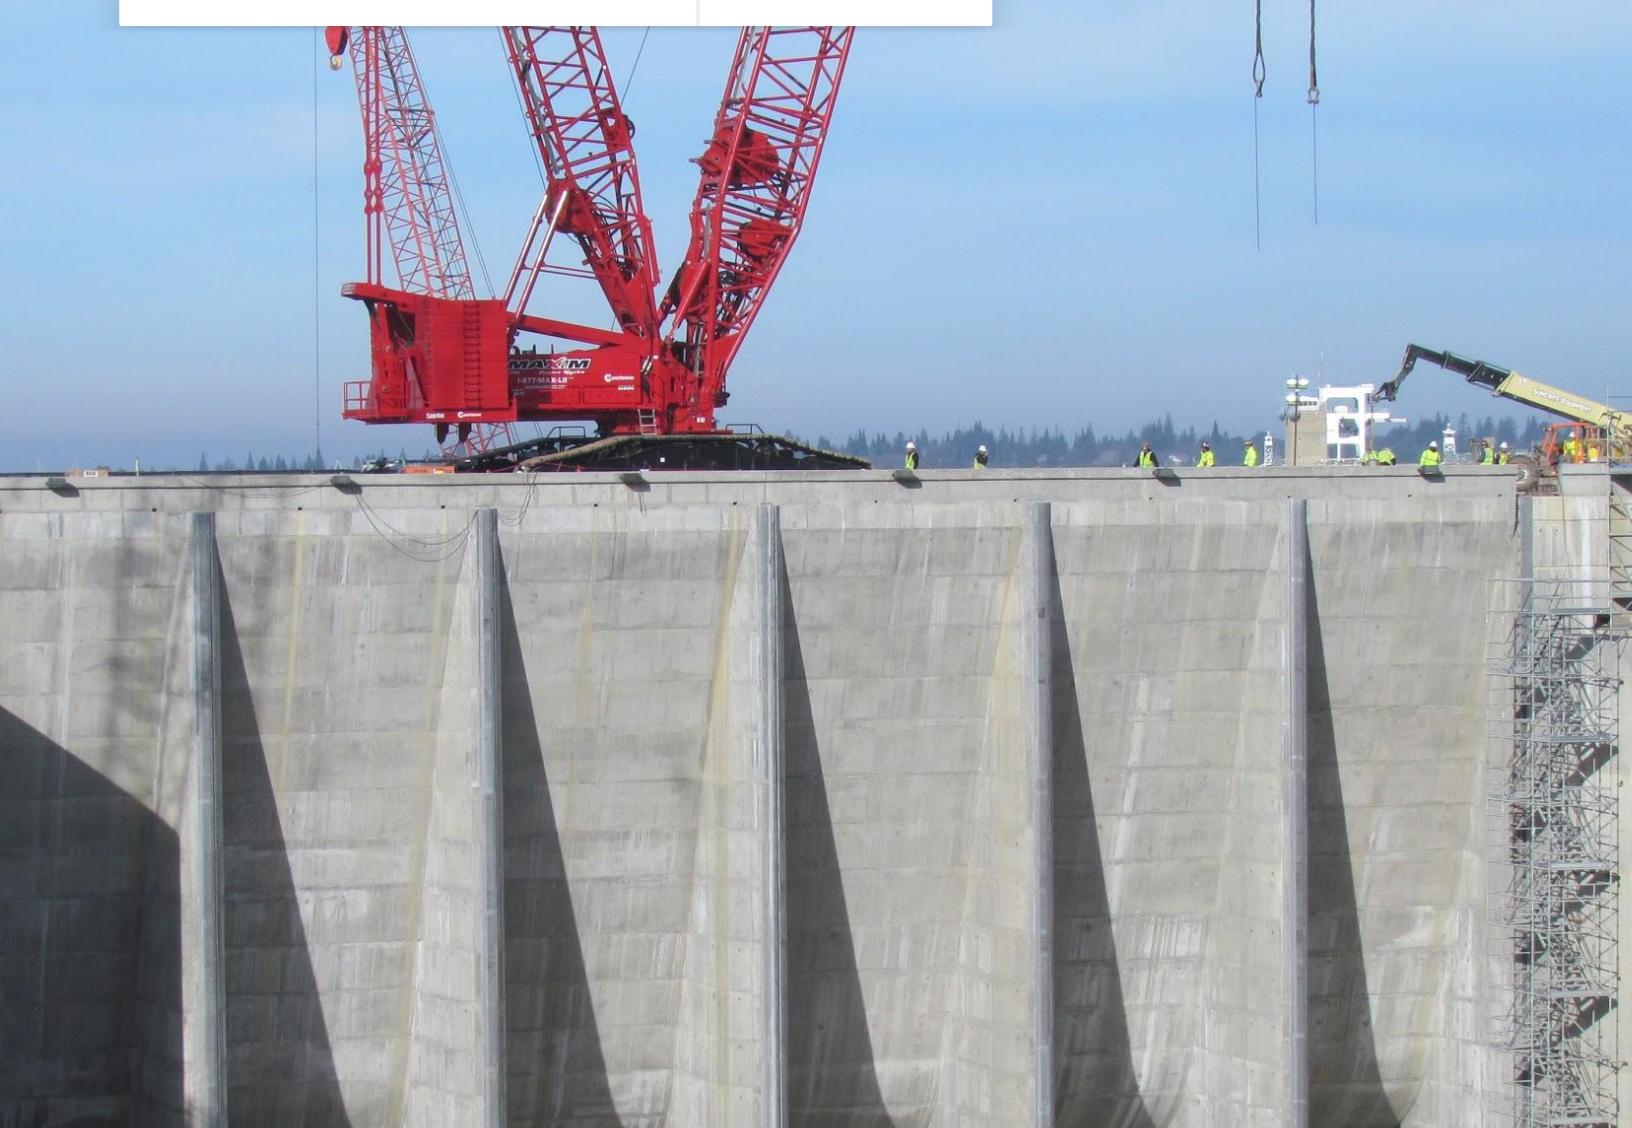

## Paper savings

Paper is no longer their main source of onsite building information, so they significantly cut printing costs.

# Cut out the busy work. Finish on time and under budget.

Folsom Dam Auxiliary Control

Heavy Civil

*“PlanGrid speeds up projects, enables efficient communication, and reduces rework. It is the best thing to happen to construction since the invention of the internal combustion engine.”*

— Granite

# Cut out the busy work. Finish on time and under budget.

Correll Hall

Education

AAI used PlanGrid to spend less time tracking and reporting issues, while providing more detailed documentation for every step in the project—even the smallest tasks. See how they saved time and money after switching.

## Labor savings \$15,000

AAI saved 150 hours in performing onsite inspections throughout the project, totaling \$15,000.

## Time savings 10-20%

PlanGrid provided greater documentation detail while streamlining communications of field conditions and resolution of issues throughout the project, transforming a report process that used to take hours into one that took only minutes.

Having everything on their devices also meant having two free hands available for testing and inspections. There was never any need to carry notepads, plans, or cameras, which saved more time.

# Everyone working together, always on the current set.

USVI Solar 1

Industrial

*“Project owners, contractors, and engineers work from the same set, with live updates. We could not have worked as quickly and diligently without PlanGrid. It is our standard tool for plans and issues tracking.”*

— AES

# Everyone working together, always on the current set.

St. Thomas More Catholic Church

Institutional

T.B. Penick & Sons, Inc. used PlanGrid to facilitate and standardize communication, especially RFIs and submittals, with their architecture firm on this design-bid-build project—which ended up being key to their operational success. See how they saved hundreds of thousands of dollars on every project after adopting PlanGrid.

## Time savings \$89,029

Over the course of 69.5 weeks, they collectively saved an estimated 18-23 hours per week, with the most significant time saving coming from the automation of annotations and plan distribution.

## Paper savings \$15,000

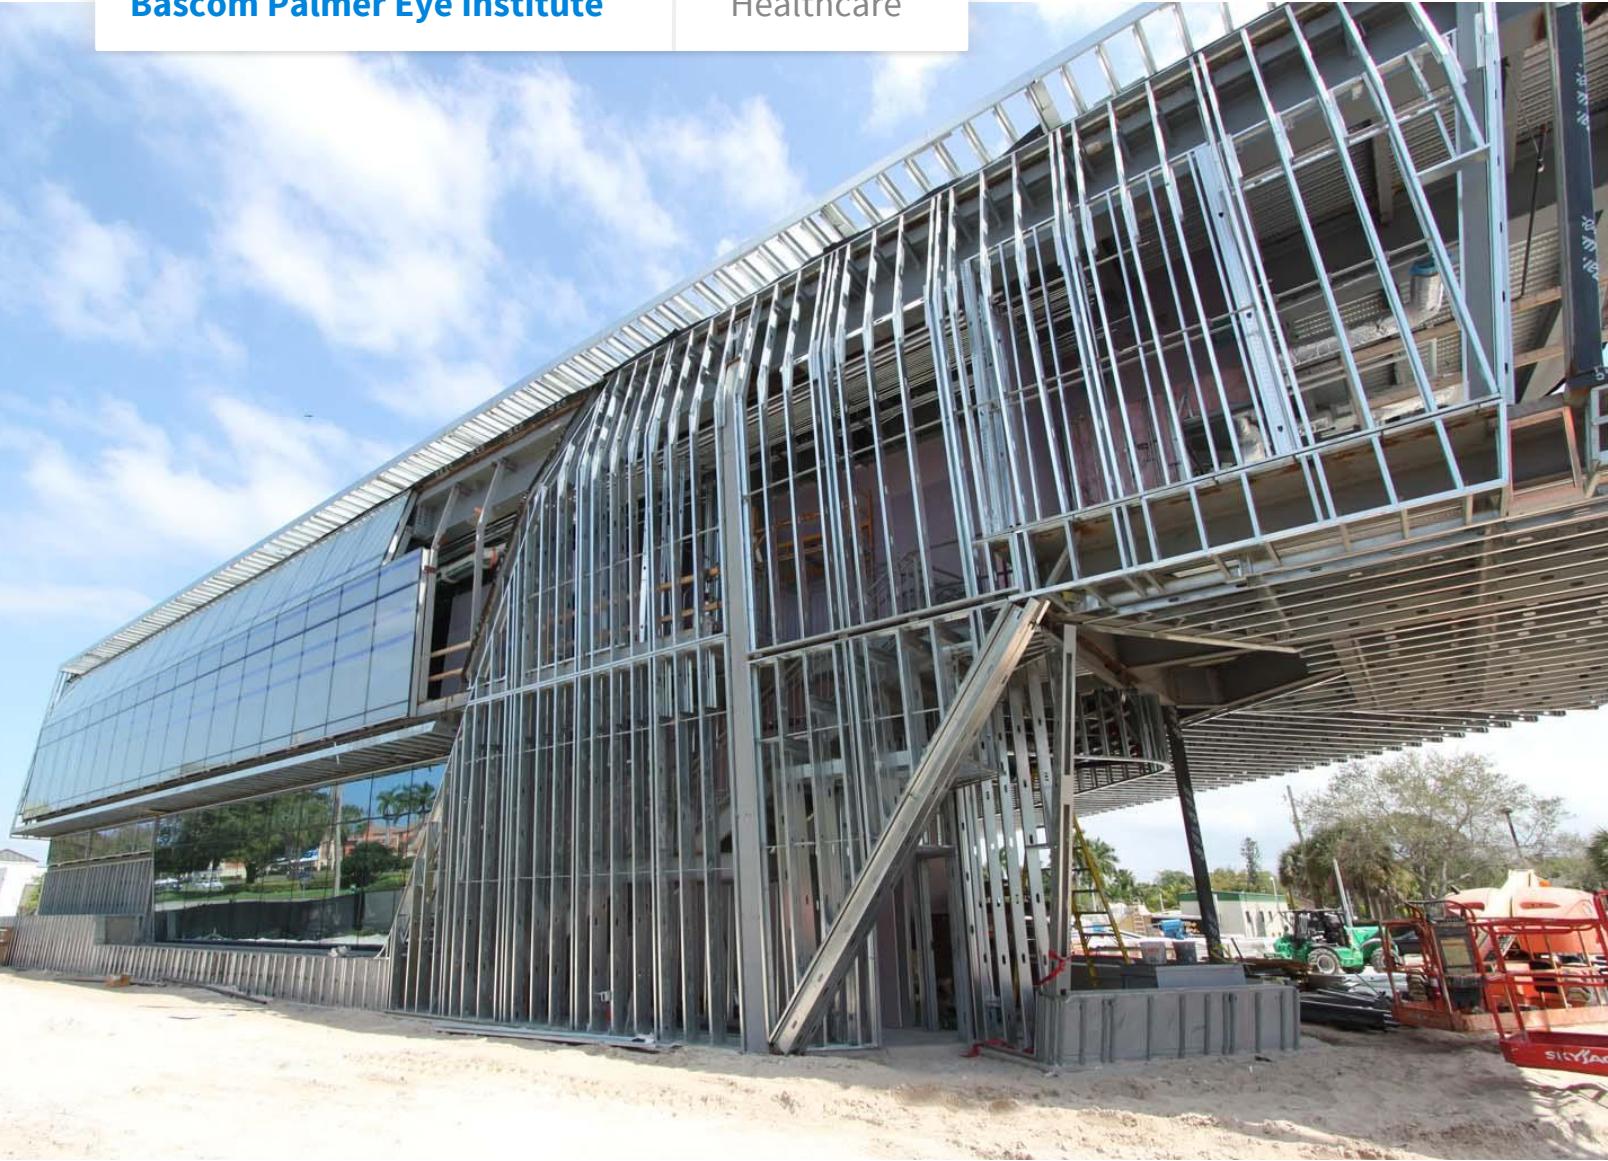

T.B. Penick & Sons, Inc. relied on PlanGrid exclusively, and did not print any plans or documents for their own use.

**Total savings: \$104,029**

# Every building detail, from design to operations.

Bascom Palmer Eye Institute

Healthcare

*“As an owner’s representative, it blows my mind that we have gone so many years without the instant and unfettered field access to all drawings, specifications, RFIs, and issues that PlanGrid provides.”*

— Marx|Okubo

# Every building detail, from design to operations.

NEA Baptist Hospital

Healthcare

Hoar Construction relied on PlanGrid to stay on time and budget by improving coordination of complex drawings, reducing paper costs and inefficiencies, and improving team collaboration across contractors, engineers, designs and building owners. See how they saved millions of dollars after switching to PlanGrid.

## Time savings \$1,197,180

Compared to using paper plans, Hoar was able to save 11 hours per user, per week at \$50 per hour—totaling \$478,872 per year.

## Rework savings \$700,000

Automatic plan syncing, distribution and versioning drastically reduced rework caused by the time it took to print and distribute paper plans, saving an estimated \$294,000 annually.

## Paper savings \$58,660

Hoar was able to stop printing paper sets completely, conserving approximately \$23,464 each year.

**Total savings: \$1,990,840**

PlanGrid is the leading provider of construction software for the field. It helps contractors, owners, and designers edit, share, and manage blueprints and project information in a single place, from any device. Over 500,000 construction projects of all sizes and from all industries use PlanGrid to save time and avoid rework.
